Emissions reduction targets

We project that carbon emissions will show moderate decline over the next five years, due to continued reduction in use of landfill and transition of site plant power from diesel to electricity.

Carbon Reduction Projects

1. In 2025, Clearaway switched to fully renewable electricity sources, ensuring zero carbon emissions for Scope 2.
2. As local energy recovery facilities come online, Clearaway is able to reduce its Scope 3 emissions by switching disposal from landfill and from RDF export..
